Pesticides are substances that are meant to control pests, including weeds. The term pesticide includes all of the following: herbicide, insecticides (which may include insect growth regulators, termiticides, etc.) nematicide, molluscicide, piscicide, avicide, rodenticide, bactericide, insect repellent, animal repellent, antimicrobial, fungicide, disinfectant (antimicrobial), and sanitizer. The most common of these are herbicides which account for approximately 80% of all pesticide use. Most pesticides are intended to serve as plant protection products (also known as crop protection products), which in general, protect plants from weeds, fungi, or insects.

This report elaborates the market size, market characteristics, and market growth of the Agricultural Pesticides industry, and breaks down according to the type, application, and consumption area of Agricultural Pesticides. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
