Abstracts

Artificial intelligence for IT operations (AIOps) is an umbrella term for the use of big data analytics, machine learning (ML) and other artificial intelligence (AI) technologies to automate the identification and resolution of common information technology (IT) issues. The systems, services and applications in a large enterprise produce immense volumes of log and performance data. AIOps uses this data to monitor assets and gain visibility into dependencies without and outside of IT systems.

This report elaborates the market size, market characteristics, and market growth of the AIOps Platform industry, and breaks down according to the type, application, and consumption area of AIOps Platform. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for AIOps Platform in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
