Abstracts

Aircraft refueling trucks are also ordinary refueling vehicles. However, many aircraft use aviation kerosene, which is different from ordinary diesel gasoline. Aviation kerosene is corrosive to common metals, so all tanks, pipelines, pumps, tankers, etc., where all kerosene flows are required to be protected with stainless steel. The cost will be several times that of a regular fuel truck.

This report elaborates the market size, market characteristics, and market growth of the Aircraft Refueling Trucks industry, and breaks down according to the type, application, and consumption area of Aircraft Refueling Trucks. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Aircraft Refueling Trucks in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
