Abstracts

An arcade game is a game machine typically found in public places like malls, restaurants and amusement arcades, and is usually coin operated. Arcade games are usually video games, pinball machines or electromechanical games. The late 1970s through the 1980s was the golden age of the arcade games. They enjoyed some relative popularity even during the early 1990s. The popularity of this platform slowly declined, however, as console and PC games came into prominence.
This report elaborates the market size, market characteristics, and market growth of the Arcade Gaming industry, and breaks down according to the type, application, and consumption area of Arcade Gaming. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Arcade Gaming in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
