Abstracts

Insulated Metal Panels (IMPs) are lightweight composite exterior wall and roof panels with metal skins and an insulating foam core. These panels have superior insulating properties, and their outstanding spanning capabilities and one-pass installation makes them quick to install, saving costs compared to other wall assemblies.

This report elaborates the market size, market characteristics, and market growth of the Architectural insulated metal panels industry, and breaks down according to the type, application, and consumption area of Architectural insulated metal panels. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Architectural insulated metal panels in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
