Abstracts

Atomic layer deposition is a key manufacturing process in the fabrication of semiconductor devices, and part of the set of tools available for the synthesis of nanomaterials. It is considered as one of the significant deposition method for producing thin conformal films. The demand for complex and miniaturized components coupled with the advent of nano-technology has driven the ALD market.

This report elaborates the market size, market characteristics, and market growth of the Atomic Layer Deposition (ALD) industry, and breaks down according to the type, application, and consumption area of Atomic Layer Deposition (ALD). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Atomic Layer Deposition (ALD) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
