Abstracts

An all-terrain vehicle (ATV), also known as a quad, quad bike, three-wheeler, four-wheeler or quadricycle as defined by the American National Standards Institute (ANSI) is a vehicle that travels on low-pressure tires, with a seat that is straddled by the operator, along with handlebars for steering control. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles. The side-by-side (often written as SxS) is a small 2- to 6-person four-wheel drive off-road vehicle, also called UTV (utility vehicle or utility task vehicle), a ROV (recreational off-highway vehicle), or a MOHUV (multipurpose off-highway utility vehicle).

This report elaborates the market size, market characteristics, and market growth of the ATV and SSV industry, and breaks down according to the type, application, and consumption area of ATV and SSV. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
