Abstracts

Automated fingerprint identification is the process of using a computer to match fingerprints against a database of known and unknown prints. Automated fingerprint identification systems (AFIS) are primarily used by law enforcement agencies for criminal identification purposes, the most important of which is the identification of a person suspected of committing a crime or linking a suspect to other unsolved crimes. This report elaborates the market size, market characteristics, and market growth of the Automated Fingerprint Identification Systems (AFIS) industry, and breaks down according to the type, application, and consumption area of Automated Fingerprint Identification Systems (AFIS). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed.
