## **Abstracts**

Automatic fire suppression systems control and extinguish fires without human intervention. Examples of automatic systems include fire sprinkler system, gaseous fire suppression, and condensed aerosol fire suppression. When fires are extinguished in the early stages loss of life is minimal since 93% of all fire-related deaths occur once the fire has progressed beyond the early stages.

This report elaborates the market size, market characteristics, and market growth of the Automatic Fire Suppression Systems industry, and breaks down according to the type, application, and consumption area of Automatic Fire Suppression Systems. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
