Abstracts

Automatic Identification and Data Capture (AIDC) involves capturing data automatically using equipment, such as barcode readers, or technologies, including RFID and speech recognition. Automatic Identification and Data Capture involves the use of magnetic stripe readers, optical character recognition, barcode scanners, RFID, and speech recognition to capture data automatically. It is a method used for recognizing objects, gathering information about them, and feeding it to computer systems without any human involvement. AIDC has several advantages, including inventory management, reduction in data entry errors, and consumption of less time.

This report elaborates the market size, market characteristics, and market growth of the Automatic Identification and Data Capture industry, and breaks down according to the type, application, and consumption area of Automatic Identification and Data Capture. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Automatic Identification and Data Capture in a special period.
