Abstracts

Windows Automation Software allows you to record, build and replay windows macros which automate other software processes and repetitive tasks. These could be any task on your PC. Automation Software macros can automate user interfaces by simulating user activity – e.g. press keys, click the mouse, and interact with other windows. This means that almost any task you perform on your computer can be automated and turned into a macro; and because a macro can emulate a user ANY Windows application can be automated. And you can automate web applications as well as desktop applications.
