## Abstracts

An automotive engine encapsulation seals the isolated engine from the external environment and keeps the heat engine off even if it is turned off. This slows down the engine cooling rate and then provides initial heat during engine cranking.

This report elaborates the market size, market characteristics, and market growth of the Automotive Engine Encapsulation industry, and breaks down according to the type, application, and consumption area of Automotive Engine Encapsulation. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Automotive Engine Encapsulation in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
