Abstracts

For the past decade, high volume growth in vehicle sales has created problems for automotive manufacturers, garages stations, and tire vendors. Compared to the fleet of vehicles that hit the roads every year, garage owners have faced difficulties while handling these large number in limited work spaces. From an OEM standpoint, manufacturing vast units of vehicles demands a greater utility of lifting systems, considering the confined spaces of manufacturing plants. Automotive lifts have served a key purpose of space optimization in today's automotive landscape.

This report elaborates the market size, market characteristics, and market growth of the Automotive Lifts industry, and breaks down according to the type, application, and consumption area of Automotive Lifts. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Automotive Lifts in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
