Abstracts

Printed circuit boards are used in many ways in the automotive industry and have changed the way that people drive. Anti-lock brake systems and other safety and security features, ECU systems that control engines, and GPS navigation systems all require PCBs. The need for PCBs will increase as vehicle owners and drivers demand more accessories in vehicles, such as televisions that passengers can view. A printed circuit board used in a car or truck, sub assembly or dealer support system must be highly reliable, long-lasting and be highly competitive in price.

This report elaborates the market size, market characteristics, and market growth of the Automotive Printed Circuit Board (PCB) industry, and breaks down according to the type, application, and consumption area of Automotive Printed Circuit Board (PCB). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
