Abstracts

Relays are switches that open and close circuits electromechanically or electronically. They control one electrical circuit by opening and closing contacts in another circuit. Relays are generally used to switch smaller currents in a control circuit and do not usually control power consuming devices except for small motors and Solenoids that draw low amps. Automotive Relay is a relay used in automobile.
This report elaborates the market size, market characteristics, and market growth of the Automotive Relays industry, and breaks down according to the type, application, and consumption area of Automotive Relays. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Automotive Relays in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
