## Abstracts

Solar control glass is specially treated glass which is designed to keep car interiors comfortable by preventing the buildup of solar heat. Solar control glass is not necessarily colored or mirrored glass, although such finishes can be applied for aesthetic purposes if desired. It incorporates invisible layers of special materials on the glass which have the dual effect of allowing sunlight in while repelling solar heat. Solar control glass units are typically double glazed, which means they also insulate well. This report elaborates the market size, market characteristics, and market growth of the Automotive Solar Control Glass industry, and breaks down according to the type, application, and consumption area of Automotive Solar Control Glass. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Automotive Solar Control Glass in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
