Abstracts

The automotive transfer case is a unit of gears that distributes the power between front and rear axle of an all-wheel drive (AWD) or a four-wheel drive (4WD) vehicle. In the all-wheel drive mode, the transfer case distributes torque among all the four wheels of a vehicle and if one wheel loses traction, higher torque goes to the wheel with less traction. The transfer case is made of cast iron or cast aluminum body and consist of a planetary gear unit.

This report elaborates the market size, market characteristics, and market growth of the Automotive Transfer Case industry, and breaks down according to the type, application, and consumption area of Automotive Transfer Case. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
