Abstracts

Unmanned surface vehicle (USV) also known as autonomous surface vehicles (ASV) operate on the surface of the water without any crew. These are far cheaper than the equivalent weather vehicles and research vehicles. The main component that drives such unmanned systems is the unmanned auto pilot system (UAPS20). These vehicles can be used to explore such places, where the climatic condition is rough thereby gathering necessary information without putting the life of any individual at stake.

This report elaborates the market size, market characteristics, and market growth of the Autonomous or Unmanned Surface Vessel (USV) industry, and breaks down according to the type, application, and consumption area of Autonomous or Unmanned Surface Vessel (USV). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Autonomous or Unmanned Surface Vessel (USV) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
