Abstracts

It is the exchange of data among operational processes and their applications, whether in one enterprise or across multiple ones. A common example would be a manufacturing firm and the ecosystem of supplier and distributor companies around it. In such examples, many enterprises are involved. However, large firms with multiple, independent business units often practice B2B DE as part of their inter-unit communications within a single enterprise. Hence, B2B DE scales up to global partner ecosystems, but it also scales down to multiple business units of the same enterprise.

This report elaborates the market size, market characteristics, and market growth of the B2B Data Exchange industry, and breaks down according to the type, application, and consumption area of B2B Data Exchange.
