Abstracts

Backup as a service (BaaS) is an approach to backing up data that involves purchasing backup and recovery services from an online data backup provider. Instead of performing backup with a centralized, on-premises IT department, BaaS connects systems to a private, public or hybrid cloud managed by the outside provider. This report elaborates the market size, market characteristics, and market growth of the Backup-as-a-service industry, and breaks down according to the type, application, and consumption area of Backup-as-a-service. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Backup-as-a-service in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
