Abstracts

A shuttlecock (also called a bird or birdie) is a high-drag projectile used in the sport of badminton. It has an open conical shape formed by feathers (or a synthetic alternative) embedded into a rounded cork (or rubber) base. The shuttlecock's shape makes it extremely aerodynamically stable. Regardless of initial orientation, it will turn to fly cork first, and remain in the cork-first orientation.
This report elaborates the market size, market characteristics, and market growth of the Badminton Shuttlecock industry, and breaks down according to the type, application, and consumption area of Badminton Shuttlecock. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
