## Abstracts

Biocides and disinfectants are chemicals or physical agents that are used to inhibit the growth of pathogenic microorganisms. They are used to kill harmful organisms and resist bacteria and fungus. These chemicals help eliminate suspended substances or impurities from contaminated water, thereby making it suitable for domestic and industrial uses. They are useful in treating ground water, sea water, municipal drinking water, and industrial waste water.

This report elaborates the market size, market characteristics, and market growth of the Biocides and Disinfectants industry, and breaks down according to the type, application, and consumption area of Biocides and Disinfectants. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Biocides and Disinfectants in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
