## Abstracts

Biomass boilers are very similar to traditional gas boilers, providing warm and hot water to the entire home space, but instead of using gas (or oil) to generate heat, they burn wood pellets that are continuously procured.

This report elaborates the market size, market characteristics, and market growth of the Biomass Boiler industry, and breaks down according to the type, application, and consumption area of Biomass Boiler. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
