## Abstracts

Brake system is a braking device consisting of a combination of interacting parts that work to slow a motor vehicle. A brake system transmits force from a driver's foot to the car's brakes. The brakes then transmit the force to the tires and road, where the friction slows and stops the vehicle.

This report elaborates the market size, market characteristics, and market growth of the Brake System industry, and breaks down according to the type, application, and consumption area of Brake System. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Brake System in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
