Abstracts

A business process is a collection of related, structured activities or tasks by people or equipment that in a specific sequence produces a service or product (serves a particular business goal) for a particular customer or customers. Business processes occur in all organizantional level and it may or may not be visible to customers. A business process may often be visualized (modeled) as a flowchart of a sequence of activities with interleaving decision points or as a process matrix of a sequence of activities with relevance rules based on data in the process. The benefits of using business processes include improved customer satisfaction and improved agility for reacting to rapid market change. Process-oriented organizations break down the barriers of structural departments and try to avoid functional silos.
This report elaborates the market size, market characteristics, and market growth of the Business Process industry, and breaks down according to the type, application, and consumption area of Business Process. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Business Process in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
