Abstracts

A VoIP business service uses your existing Internet connection to connect with a hosted PBX (private branch exchange). A hosted PBX is the system by which phone calls are routed into and out of your office. Hosted PBXs may be managed in off-site locations, or they may be virtual systems, which are hosted entirely online (via cloud technology). With a hosted PBX, you can help your business save valuable resources that could be better used in other ways.

This report elaborates the market size, market characteristics, and market growth of the Business Voip industry, and breaks down according to the type, application, and consumption area of Business Voip. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Business Voip in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
