## Abstracts

A catamaran is a multi-hulled watercraft featuring two parallel hulls of equal size. The hulls are connected by deck bridges, each with independent pushing devices. Because the two boats are connected horizontally, they can withstand large wind and waves at sea and are not easy to overturn. At high speeds, the two slimmer hulls can significantly reduce the resistance of the hull.

This report elaborates the market size, market characteristics, and market growth of the Catamaran industry, and breaks down according to the type, application, and consumption area of Catamaran. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Catamaran in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
