Abstracts

Cellulose Gel, which comes from the cell walls of plants such as wood pulp and cottonseeds, is used to make foods thick and creamy, without all the fat. If you're trying to reduce your fat intake or you're on a low-fat diet, choosing foods made with an additive like cellulose gum can help to make you feel less deprived. Cellulose Gel is essentially a thickening agent used in all kinds of food products. Many diet and low-fat products will use food additives like cellulose gum to give the food a thicker and creamier consistency, making it that much more appealing to consumers.

This report elaborates the market size, market characteristics, and market growth of the Cellulose Gel industry, and breaks down according to the type, application, and consumption area of Cellulose Gel.
