## Abstracts

A centrifugal air compressor is a type of compressor that utilizes rotating vanes or impellers to compress a gas instead of a piston. This design is used in high-end air compressors as well as on refrigeration units and air conditioners. This type of compressor is able to be used in stages to create ultra-high compression of gasses or air. This type of compressor has fewer moving parts and operates more smoothly than a piston-type compressor.

This report elaborates the market size, market characteristics, and market growth of the Centrifugal Air Compressor industry, and breaks down according to the type, application, and consumption area of Centrifugal Air Compressor. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Centrifugal Air Compressor in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
