Abstracts

Chemical management services (CMS) involve a strategic, long-term relationship in which a customer contracts with a service provider to supply and manage the customer's chemicals and related services. Under a chemical services contract, the provider's compensation is tied primarily to quantity and quality of services delivered, not chemical volume. Chemical services go beyond invoicing and delivering product to optimizing processes, continuously reducing chemical lifecycle costs and risk, and reducing environmental impact. These chemical services are often performed more effectively and at a lower cost than companies can do by themselves.

This report elaborates the market size, market characteristics, and market growth of the Chemical Management Services (CMS) industry, and breaks down according to the type, application, and consumption area of Chemical Management Services (CMS). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Chemical Management Services (CMS) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
