Abstracts

Chess is a two-player strategy board game played on a chessboard, a checkered gameboard with 64 squares arranged in an 8x8 grid.[1] The game is played by millions of people worldwide. Chess is believed to have originated in India sometime before the 7th century. The game was derived from the Indian game chaturanga, which is also the likely ancestor of the Eastern strategy games xiangqi, janggi, and shogi. Chess reached Europe by the 9th century, due to the Moorish conquest of the Iberian Peninsula. The pieces assumed their current powers in Spain in the late 15th century; the rules were standardized in the 19th century.

This report elaborates the market size, market characteristics, and market growth of the Chess industry, and breaks down according to the type, application, and consumption area of Chess. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Chess in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
