## Abstracts

A circular saw is a power-saw using a toothed or abrasive disc or blade to cut different materials using a rotary motion spinning around an arbor. A hole saw and ring saw also use a rotary motion but are different from a circular saw. Circular saws may also be loosely used for the blade itself.

This report elaborates the market size, market characteristics, and market growth of the Circular Saw industry, and breaks down according to the type, application, and consumption area of Circular Saw. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Circular Saw in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
