Abstracts

In general usage, “cloud-native” is an approach to building and running applications that exploits the advantages of the cloud computing delivery model. “Cloud-native” is about howapplications are created and deployed, not where. It implies that the apps live in the public cloud, as opposed to an on-premises datacenter.
This report elaborates the market size, market characteristics, and market growth of the Cloud Native Platform and Container Management Platforms industry, and breaks down according to the type, application, and consumption area of Cloud Native Platform and Container Management Platforms.
