Abstracts

A patrol boat (also referred to as a patrol craft, patrol ship or patrol vessel) is a relatively small naval vessel generally designed for coastal defence duties. Since the operating conditions vary widely along different coasts, a wide range of ships are required. In general, coastal patrol military vessels are smaller than the large patrol vessels and operate within sight of land. However, some coastal patrol military vessels are capable of handling very rough conditions as well. Some of the latter are 'large patrol boats' and are the exceptions generated by extremely rough coastal waters. Their speed is moderate to high. The armament is usually machine guns and small arms.

This report elaborates the market size, market characteristics, and market growth of the Coastal Patrol Military Vessels industry, and breaks down according to the type, application, and consumption area of Coastal Patrol Military Vessels. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Coastal Patrol Military Vessels in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
