Second, libraries and galleries are also collecting institutions. The Collection Management System (CMS) allows individuals or collection agencies to organize, control, and manage their collection of objects by 'tracking all information related to these objects.' In large organizations, CMS can be used by collectors (such as registrars, collection managers, and curators) to record object location, source, curation information, protection reports, professional assessments, and exhibition history. Then, all of these recorded information is also accessed and used by other agencies, such as "education, membership, accounting, and management.
