Abstracts

Oxygen systems are designed to store or to generate a supply of pure oxygen and to regulate, dilute as required and then distribute that oxygen to crew or passengers. Oxygen systems are installed in many military aircraft and in most commercial and business aircraft types. Depending upon the type and the role of the aircraft concerned, the oxygen system(s) may be used for normal operations, to provide supplemental oxygen for specific situations or for provision of emergency oxygen in the event of smoke, fire, fumes or loss of pressurisation.

This report elaborates the market size, market characteristics, and market growth of the Commercial Aircraft Oxygen System industry, and breaks down according to the type, application, and consumption area of Commercial Aircraft Oxygen System. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Commercial Aircraft Oxygen System in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
