Abstracts

Laundry refers to washing clothes and other textiles. The laundry process is usually carried out in a room reserved for this purpose; in a personal home, this is called a laundry room or utility room. Shared laundry facilities are available in the apartment building or student residence. The independent company is known as a laundromat (British English laundromat or American English laundry). The material being washed or already washed is also commonly referred to as laundry.

This report elaborates the market size, market characteristics, and market growth of the Commercial Laundry industry, and breaks down according to the type, application, and consumption area of Commercial Laundry.
