Abstracts

Community association management software provides tools for managing and organizing communities for property managers, homeowners associations (HOAs), apartment associations and cooperatives. Property managers and HOAs can use community association management software to organize their communities and ensure that all members receive the latest dues and other paperwork and ensure the meeting goes smoothly. Resident portals or community sites are often included, so residents and property managers can update important events to the community, schedule meetings or events, pay membership fees or create maintenance requests.
Community association management software is similar in many respects to association management software, but community association software is entirely focused on residential associations rather than non-profit organizations or hobby-based groups. Community association software can be integrated with property management software, multi-family software or facility management software to enable property managers to better organize their physical assets and residents.
This report elaborates the market size, market characteristics, and market growth of the Community Association Management Software industry, and breaks down according to the type, application, and consumption area of Community Association Management Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Community Association Management Software in a special period. This chapter also
