## Abstracts

Solar photovoltaic is a technology that converts solar energy into a form of useful energy by absorbing solar photons (light particles that operate in a single unit of energy). CPV (concentrated photovoltaic) technology uses optics such as curved mirrors or lenses to collect large amounts of sunlight on small-area solar photovoltaic (PV) cells to generate electricity.

This report elaborates the market size, market characteristics, and market growth of the Concentrated Photovoltaics industry, and breaks down according to the type, application, and consumption area of Concentrated Photovoltaics.
