Abstracts

Concrete fiber is a kind of high performance fiber specially used for concrete/mortar. It can effectively control the microcracks caused by plastic shrinkage, drying shrinkage and temperature change of concrete/mortar, prevent and restrain the formation and development of primary cracks in concrete, and greatly improve the crack-proof, impermeability and abrasion resistance of concrete/mortar. Increase the toughness of concrete, thereby improving the service life of concrete.

This report elaborates the market size, market characteristics, and market growth of the Concrete Fiber industry, and breaks down according to the type, application, and consumption area of Concrete Fiber. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
