Abstracts

Concrete sealers are applied to concrete to protect it from surface damage, corrosion, and staining. They either block the pores in the concrete to reduce the absorption of water and salts or form an impermeable layer which prevents such materials from passing.

This report elaborates the market size, market characteristics, and market growth of the Concrete Sealers industry, and breaks down according to the type, application, and consumption area of Concrete Sealers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Concrete Sealers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
