Abstracts

A condom is a sheath-shaped barrier device, used during sexual intercourse to reduce the probability of pregnancy or a sexually transmitted infection (STI). Their use greatly decreases the risk of gonorrhea, chlamydia, trichomoniasis, hepatitis B, and HIV/AIDS. They also to a lesser extent protect against genital herpes, human papillomavirus (HPV), and syphilis.
This report elaborates the market size, market characteristics, and market growth of the Condom industry, and breaks down according to the type, application, and consumption area of Condom. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
