Abstracts

Fluorescent microscopy not only makes our images look good, but it also allows us to gain a better understanding of cells, structures, and tissue. With confocal laser scanning microscopy (CLSM) we can find out even more.

CLSM combines high-resolution optical imaging with depth selectivity which allows us to do optical sectioning. This means that we can view visual sections of tiny structures that would be difficult to physically section (e.g. embryos) and construct 3-D structures from the obtained images.

This report elaborates the market size, market characteristics, and market growth of the Confocal Laser Scanning Microscope (CLSM) industry, and breaks down according to the type, application, and consumption area of Confocal Laser Scanning Microscope (CLSM). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Confocal Laser Scanning Microscope (CLSM) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
