## Abstracts

Contract Pharmaceutical Manufacturing is a process of outsourcing certain production activities to third party manufacturers. These manufacturers are given the chemical formulation by pharma companies. This type of contract manufacturing is witnessing a rising trend as more and more pharma companies are trying to focus more on R&D of drugs rather than getting involved in the production of drugs in order to gain competitive advantage in the business. This industry is classified into API manufacturing and Finished Dosage formulation(FDF) manufacturing.

This report elaborates the market size, market characteristics, and market growth of the Contract Pharmaceutical Manufacturing industry, and breaks down according to the type, application, and consumption area of Contract Pharmaceutical Manufacturing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Contract Pharmaceutical Manufacturing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
