Abstracts

Copper is a metal and is indicated by the Cu symbol. It is highly conductive and thermally conductive, so it is actively used in the construction of various buildings, solar energy transmission, high-speed data transmission lines, alloy materials or telecommunication instruments, and storage of nuclear waste or superconductors. In addition to its technical use, it is also used as a wood preservative, bacteriostatic and fungicide. Because of its soft shape, it has plasticity and soft physical properties, so it is widely used in the manufacture of cables and pipes

This report elaborates the market size, market characteristics, and market growth of the Copper Mining industry, and breaks down according to the type, application, and consumption area of Copper Mining. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
