Abstracts

Cotton is a crop that is majorly used in textile industries. It is a perennial crop that is harvested in moderate rainfall and during a frost-free period with plenty of sunshine. Cotton is a labor-intensive farm crop. It is somewhat salt- and drought-tolerant, which makes it an attractive crop for the arid and semi-arid regions. However, the major problem with the cotton crop is its pest control, extensive farming, and labor requirement.

This report elaborates the market size, market characteristics, and market growth of the Cotton industry, and breaks down according to the type, application, and consumption area of Cotton. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
