Abstracts

The potential threat posed by an inexpensive drone carrying a home-made bomb near an airplane or a football field is now apparent to everybody; however, little has been done to mitigate the issue. Counter-drone technology, also referred to as anti-drone, refers to systems that are used to detect and/or intercept unmanned aircrafts. These systems are also known as counter-UAS, C-UAS, or counter-UAV.

This report elaborates the market size, market characteristics, and market growth of the Counter-Drone industry, and breaks down according to the type, application, and consumption area of Counter-Drone. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Counter-Drone in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
