Abstracts

Counter-UAV technology, refers to systems that are used to detect and/or intercept unmanned aircraft. As concerns grow around the potential security threats drones may pose to both civilian and military entities, a new market for counter-drone technology is rapidly emerging. To date, we have found at least 235 counter-drone products either on the market or under active development. "Counter-Drone Systems," a new report published by the Center for the Study of the Drone, provides background on the growing demand for C-UAS technology, describes how the technology works, presents our database of known C-UAS systems from around the globe, and explains some of the challenges surrounding counter-drone technology use.

This report elaborates the market size, market characteristics, and market growth of the Counter UAV industry, and breaks down according to the type, application, and consumption area of Counter UAV. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Counter UAV in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
