Abstracts

CEPs are used for the delivery of parcels and documents to various types of customers such as business customers, retail customers, and government agencies. The documents and parcels delivered by the CEP vendors are non-palletized items and weigh less than 110 pounds. Express delivery is a time-bound delivery, where the shipment is delivered within a day or two and also as per the requirements of a customer. Whereas, courier service providers deliver shipments that are in very short distance. In addition, CEP vendors provide various value-added services to customers, further enhancing the delivery process.

This report elaborates the market size, market characteristics, and market growth of the Courier, Express and Parcel (CEP) industry, and breaks down according to the type, application, and consumption area of Courier, Express and Parcel (CEP). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Courier, Express and Parcel (CEP) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
