Abstracts

A crawler crane is a type of mobile crane available with either a telescopic or lattice boom that moves upon crawler tracks. As a self-propelled crane, it is able to move around a site and perform jobs without much set-up. However, because of its great weight and size, it is quite difficult and expensive to transport the crawler crane from site to site.

This report elaborates the market size, market characteristics, and market growth of the Crawler Crane industry, and breaks down according to the type, application, and consumption area of Crawler Crane. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Crawler Crane in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
